
Master studies.

Department's research projects

Romanian rules about master studies (HG 404/2006)

- The programme should include a scientific research component
 - Research activities should be done in a group
 - including PhD students, teachers and researchers
 - The results of the master student can be published in journals/proceedings and in the dissertation thesis
 - The dissertation thesis should include elements of originality and methods of scientific validation
-

Permanent Staff

Name	Research topics
Cosmin Bonchis	Information theory, Membrane computing, Parallel and distributed computing
Adrian Craciun	Automated reasoning
Mihai Chis	Group theory; Computational algebra
Mircea Dragan	Computational geometry
Isabela Dramnesc	Automated reasoning
Madalina Erascu	Distributed (Cloud) Computing, Formal Verification, Automated Theorem Proving, Symbolic Computation (Computer Algebra)
Marc Frincu	Grid computing; Tasks scheduling
Fortis Teodor Florin	Workflows; web technologies; Ontologies
Mihail Gaiianu	Computational geometry; Image processing
Victoria Jordan	Mathematical models in flight control; Workflows; Ontologies
Gabriel Istrate	Combinatorial and game-theoretic models in theoretical computer science; Computational complexity; Combinatorial models of complex systems
Gabriel Iuhasz	Multiagent systems; Video games
Eva Kaslik	Mathematical models in aerospace science; Neural network dynamics
Mircea Marin	Declarative programming; Automated reasoning; Formal languages; Computer Algebra; Multiagent systems
Liviu Maftciu Scai	Parallel computing, Numerical methods, Metaheuristics
Flavia Micota	Evolutionary computing, Bio-inspired metaheuristics
Stelian Mihalas	Number theory; Graph theory
Cristina Mindruta	Workflows; Web services; Ontologies
Marian Neagul	Big data; Cloud computing
Viorel Negru	Intelligent systems; Multi-agent systems
Darian Onchis	Signal and image processing
Silviu Panica	Cloud computing; High Performance Computing
Dana Petcu	Distributed computing; Grid computing; Cloud computing; Parallel computing
Daniel Pop	Knowledge discovery; Big data; High performance computing
Horia Popa	Knowledge discovery; Recommender systems
Adriana Popovici	Cellular automata
Ciprian Pungila	Intelligent systems; Anomaly detection
Monica Tirea	Multiagent systems; Financial modeling
Adriana Tanasie	Mathematical models in crystal growth
Daniela Zaharie	Evolutionary computing; Nature inspired metaheuristics; Knowledge discovery

Titles Text

The e-infrastructure accessible to researchers consists of:

- **Cluster 1** (2002 with an update in 2005): 14 nodes (28 cores)
- **Cluster 2** (2006): 7 nodes (28 cores)
- **Cluster 3** (2008): 8 nodes (32 cores)
- **Cluster 4** (2008): 4 nodes (16 cores)
- **IBM Cluster** (2010): 50 servers (400 cores)
- **BlueGene/P** (2011): 4096 cores
- **GPU Computing Cluster** (2012) - 3100 CUDA cores

Welcome

Institute e-Austria Timisoara is a research institute created in 2002, which is dedicated to the promotion of excellence in scientific research and technological transfer in the field of information technologies.

One of the main goals is to promote cooperation between Romania and other European countries, both scientifically and economically.

The institute is a private non-profit research association between:

- RISC (Research Institute for Symbolic Computation, Linz, Austria)
- UVT (Universitatea de Vest Timisoara, Romania) and
- UPT (Universitatea Politehnica Timisoara, Romania),

The funds for the institute start-up were provided by:

- BMWF (Austrian Ministry of Education, Science, and Culture),
- BMWA (Austrian Ministry of Economy) and
- MEC (Romanian Ministry of Education and Research)
